SUMMARY

AI Product Designer and Product Lead with 7+ years in technology, including 6+ years in UX and product design. Focused on Human–AI Interaction, Agentic AI UX, Conversational AI, and AI product strategy for LLM-powered, Generative AI (GenAI) products. Experienced in taking B2B and enterprise SaaS products from early concept to production, translating complex AI agent capabilities into goal-oriented, human-in-the-loop workflows that help people understand, trust, and work effectively with AI.

SELECTED IMPACT

- Drove Allyra.ai's shift from an agent-building tool to an organisation-ready enterprise AI platform.
- Designed interaction patterns and task-focused, human-in-the-loop workflows for 19+ AI agents.
- Expanded Allyra's reach across 15+ organisations through platform usage and API integrations.
- Speaker at TiE Chandigarh on AI and Human-Centred Design.

EXPERIENCE

Product Lead

Jan 2025 – Present

PANSOPHIC TECHNOLOGIES

*(Promoted into Product Leadership following transition of the core **Vrozart** team into **Pansophic Technologies**)*

- Led product direction, roadmap prioritisation, and end-to-end UX strategy for Allyra.ai, an enterprise B2B AI platform, repositioning it from agent building toward organisation-ready workflows and taking it from pilot to production.
- Designed conversational, Human in the Loop experiences for LLM-powered agents, letting users define goals, follow progress, understand actions, and stay in control through approvals, with AI guardrails for how agents act and escalate to humans.
- Validated workflows through usability testing and user research with customers, turning feedback into prioritised requirements and product improvements.
- Led a team of 3 designers and 2 business analysts, managing stakeholders across engineering, sales, marketing, and leadership, with delivery tracked in Jira.
- Increased design throughput from about 1 to 2–3 features per designer per week through AI-assisted workflows, rapid prototyping, and coded HTML prototypes alongside Figma.
- Designed workflow automation for Tulah, a wellness and hospitality platform, replacing fragmented spreadsheets, documents, forms, and manual communication with connected digital workflows.
- Supported product and UX direction for early-stage AI platforms Raxaa.ai and EOMs.ai.

UXD Head

Jun 2024 – Dec 2024

VROZART DACKSON ENTERPRISE PVT. LTD.

*(Core Team transitioned to **Pansophic Technologies**)*

- Co-authored the Vibe UX Framework, establishing principles for context-aware and AI-native user experiences.
- Led UX strategy and interaction design across enterprise SaaS, AI-powered products, and consumer platforms.
- Directed product experiences for Farmland Bazaar, Evosell by Evoluxar, and VousVous across customer discovery, user flows, workflows, and information architecture.
- Established scalable, accessibility-aware (WCAG) design systems and developer handoff processes, integrating AI-assisted workflows into concept exploration and prototyping.

UI/UX Designer
May 2023 – Jun 2024

VERTISYSTEM

*(Client: **Stanford Medicine**)*

- Partnered with Stanford Medicine stakeholders to translate complex administrative processes into structured digital workflows, user flows, wireframes, and high-fidelity prototypes.
- Designed end-to-end UI/UX flows for student administrative systems covering semester and course planning, financial accounts, and scholarships.
- Owned design for the Financial Aid app, working with distributed engineering and stakeholder teams.
- Received written appreciation from Stanford Medicine leadership for contributions that were instrumental to project success.

User Interface Designer
Jun 2022 – May 2023

JOONIFY

- Designed end-to-end product experiences across web and mobile platforms for parents and children.
- Created the Talent Discovery Assessment journey, helping deliver personalised learning and growth insights through guided assessments.
- Designed onboarding, assessment, and learning experiences for a platform serving 750+ parents.

UI/UX Designer
May 2021 – May 2022

5EXCEPTIONS SOFTWARE SOLUTIONS

- Designed digital products across healthcare, fintech, education, utilities, and emerging technology domains.
- Delivered UX/UI for web, mobile, enterprise software, e-commerce, and HMI interfaces, including responsive design, design systems, and developer handoff.

UI/UX Designer (FREELANCE)
Oct 2020 – May 2021

ROBO INVENTORS

- Delivered e-commerce, IoT, and smart-home products, contributing from UX strategy to production-ready interfaces.

Assistant System Engineer
Jun 2019 – Sep 2020

TATA CONSULTANCY SERVICES

- Supported Apple's enterprise production systems while building a strong foundation in large-scale operations, incident management, and enterprise software.

EDUCATION & CERTIFICATION

Bachelor of Engineering (Computer Science)
2015–2019

INDORE INSTITUTE OF SCIENCE AND TECHNOLOGY

Google UX Design Professional Certificate
2023

GOOGLE | COURSERA

CORE SKILLS

AI & PRODUCT:

Human–AI Interaction • Agentic AI UX • Conversational AI • LLM-Powered Products • Generative AI (GenAI) • Human-in-the-Loop Design • AI Guardrails • Multi-Agent Workflows • AI Product Strategy

PRODUCT:

Product Roadmap & Prioritisation • Product Discovery • 0-to-1 Product Development • Stakeholder Management • Cross-Functional Leadership • Enterprise SaaS • Workflow Automation

DESIGN:

UX Strategy • Interaction Design • User Flows • Wireframing • Information Architecture • Usability Testing • User Research • Accessibility (WCAG) • Design Systems • Rapid Prototyping • Developer Handoff

TOOLS:

Figma • Figma Make • Jira • Claude • ChatGPT • Gemini • Antigravity • HTML Prototyping
